# ER MODEL DIAGRAM

SMALL CHANGES FOR PHASE 1

We changed the names of key attributes of some entities. Like ID, names are changed to C-ID, T-ID, and so on.

1) Eg: if the entity is Team and attribute is the ID we changed the attribute name to T-ID

(Well the reason is that in the textbook almost all the attributes names are shown as duplicates. But we figured out that it would be a mess while assigning foreign keys and all… So we changed them :))

2) We didn't mention the corresponding orders of ratios in relationship type constraints. We rectified them using (min, max) constraints instead of ratios.
